

The 2007 Import and Export Market for Hybrid Integrated Circuits in Canada

On the demand side, exporters and strategic planners focusing on hybrid integrated circuits in Canada face a number of questions. Which countries are supplying hybrid integrated circuits to Canada? How important is Canada compared to others in terms of the entire global and regional market? How much do the imports of hybrid integrated circuits vary from one country of origin to another in Canada? On the supply side, Canada also exports hybrid integrated circuits. Which countries receive the most exports from Canada? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for hybrid integrated circuits in Canada. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for hybrid integrated circuits for those countries serving Canada via exports, or supplying from Canada via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In what follows, Chapter 2 begins by summarizing where Canada fits into the world market for imported and exported hybrid integrated circuits. The total level of imports and exports on a worldwide basis, and those for Canada in particular, is estimated using a model which aggregates across over 150 key country markets and projects these to the current year. From there, each country represents a percent of the world market. This market is served from a number of competitive countries of origin. Based on both demand- and

supply-side dynamics, market shares by country of origin are then calculated across each country market destination. These shares lead to a volume of import and export values for each country and are aggregated to regional and world totals. In doing so, we are able to obtain maximum likelihood estimates of both the value of each market and the share that Canada is likely to receive this year. From these figures, rankings are calculated to allow managers to prioritize Canada compared to other major country markets. In this way, all the figures provided in this report are forecasts that can be combined with internal information sources for strategic planning purposes.

Imports of Electronic Integrated Circuits in China increased to 24823 MILLIONS Imports of Electronic Integrated Circuits in China averaged 18951.55 MILLIONS from 2007 until Exports to India, 5949567.00, 5533093.00, 5949567.00, 2326991.00, USD THO, [+] Russia Trade Surplus Below Market Expectations In April. **The 2011 Import and Export Market for Hybrid Integrated Circuits in** 20 2008 2009 2010 2011 2012 2013 2014 2015 Import Export Top 5 Products exports imports at HS 6 digit level Product Name, Hybrid integrated circuits.
