

Human Development: Young Children with Developmental Challenges: Attention-Deficit/Hyperactivity Disorder (DVD) (Pediatrics and Obstetrics)

This segment describes predominant symptoms of Attention-Deficit/Hyperactivity Disorder including inattention, hyperactivity and impulsivity, and then discusses its epidemiology. Early identification and treatment of the disorder are also discussed along with the importance of identifying co-existing problems. Treatment, including psychosocial and academic interventions as well as pharmacologic measures and parent education, are presented as well.
