The government is pursuing her. Her family is missing and the only person who can help her is a thousand miles away. Sometimes, even the most remarkable people go unnoticed. Sometimes they don't. Emily Troy was a beautiful little girl born in the heartland. Her parents coped with her inability to speak; a defect with which she was born. When she was about eight, a bizarre change to her biological makeup caused her world and that of her parents to explode. Emily Troy suddenly and without warning, disappeared. She wasn't abducted. She didn't run away. She simply became invisible for some inexplicable reason. Now, at nineteen and in an ironic twist, she draws the attention of an intelligence shadow agency determined to use her condition for military applications. Held in a secret research facility and being studied, she must use her most valuable asset to escape... her wits.
